Acetate in experimental porphyria 187
Acetyl coenzyme A 9, 176
Achromobacter metalcaligenes 28, 57
Acrylic acid porphyrin 453
Acrylic porphyrin 453
Actinomycin D 21, 28, 74, 237, 258
Acute intermittend porphyria (AIP) 246, 286, 314, 326, 343, 354, 367, 383, 401, 488, 494
– brown pigments in urine 383
– erythrocyte 343
–, family pedigree of 328
Acute porphyria, neurological dysfunction in 246
Adenosine-3′, 5′-cyclic monophosphate 203, 299
Adenosine diphosphate (ADP) 472
Adenosine triphosphate (ATP) 9, 21, 50, 101, 128, 203, 246, 252
Adenylate nucleotides 101
Adenylcyclase 246
Aetiocholanolone 314
Alcohol 305
Allyl*iso*propylacetamide (AIA) 101, 181, 196, 203, 211, 237, 246, 252, 258, 266, 276, 286, 295, 302
p-Aminobenzoic acid 187
bis-(2-Amino-2-carboxyethyl) trisulphide 79
δ-Aminolaevulic acid (δ-aminolaevulinic acid; ALA; 5-ALA) 9, 28, 42, 50, 65, 124, 187, 203, 231, 237, 246, 289, 305, 314, 326, 343, 354, 367, 494
–, exogenous 231
– formation in chlorella 124
–, oral intake of 343
–, oral load of 305, 343
– in reticulocytes 472
–, stimulation of porphyrin synthesis by 28
–, synthesis of 74
– and vitamin C deficiency 237
δ-Aminolaevulic acid excretion, effect of benzoic acid 187
δ-Aminolaevulic hydro-lyase 65
δ-Aminolaevulic acid synthase (δ-aminolaevulinic acid synthetase; ALA-S; 5-ALA-S) 9, 21, 28, 57, 74, 79, 94, 101, 115, 160, 172, 176, 181, 187, 196, 211, 224, 237, 246, 266, 276, 286, 295, 302, 314, 326, 334, 343, 354, 367, 472, 494
– and chlorophyll synthesis 115
–, control of 252, 302
–, control of, in *Micrococcus denitrificans* 21
–, control of, in *Rhodopseudomonas spheroides* 79
– in cytosol 6, 75, 94
– effect of acetate 246
– effect on methionine 21
– effect on oxygen 74
– effect of phenobarbital 237
–, effect of pyridoxal-phosphate on 138
– effect of sulphur compounds 79
– feedback inhibition by heme 1, 74
– feedback inhibition in chlorophyll synthesis 115
–, glucose effect on 9
–, half-life time of 258, 302
– hepatic 354
–, induction of 203, 295
–, induction of, in chlorophyll biosynthesis 108
– induction by drugs 258
– induction by fasting 295
–, methionine effect on 1
– in mitochondria 75, 138, 252, 302
–, purification of 86, 94
– rat liver 334
– rate-limiting enzyme 231
– reduction of holoenzyme 94
–, regulation of 246, 295

– in mitochondria 75, 138, 252, 302
–, purification of 86, 94
– rat liver 334
– rate-limiting enzyme 231
– reduction of holoenzyme 94
–, regulation of 246, 295

– in respiratory adaptation 1
– stimulation by heme(enhancement)74,75
– suppression of formation 74
δ-Aminolaevulinate 196, 266
δ-Aminolaevulinate dehydratase 9, 65, 101, 109, 124, 494
– in erythocyte 326
–, inheritance of 326
–, microassay of 326
Aminomethyldipyrrylmethane 419
Aminopyrine-demethylase 367
Androsterone 314
L-Ascorbate 237, 246
L-Ascorbic acid in liver 237
Atmospheric oxygen 415
Avian hepatocytes 231
L-Azaserine 21

Bacillus cereus 42
– *subtilis* 50, 57
– *polymyxa* 42
Bacteriochlorophyll 21
–, synthesis of 79, 101, 124
Benzoic acid 187
Bilirubin 383
Bipyridine 463, 472, 495
Bovine serum albumin 472
N-Bromosuccinimide 480
Brown pigments of fuscin type in acute intermittend porphyria 383

Caffeine 203
Catalase 65, 295, 494
Chemical oscillations 415
Chick embryo liver 302
– tissue 231, 258
Chlorella fusca 115
Chlorin 415, 425
Chlorocruoroporphyrin 453
Chlorophyll 108, 115
Chlorophyll biosynthesis
–, control of 108
– working model 108
Chlorophylls a and b 115
–, extinction coefficients of 115
Chlorophyll synthesis 124
–, inhibition of 115
Chloroquine 367
–, therapy of 305
Cholestatic jaundice 460
Chromatium 50
Chromatophore fraction 86
Cirrhosis of the liver 460
Citrate 252, 302
Citric acid 314
Citrobacter freudii 57
Coenzyme A 9, 176
– metabolism 187
CO^{2+}-mesoporphyrin chelatase 266
Congenital erythropoietic porphyria 389, 433
Coproporphyrin 28, 50, 74, 231, 266, 305, 314, 334, 343, 389, 433, 448, 494
–, ethionine, effect on 21
– faeces 401
Coproporphyrin isomers
– I, II, III and IV 441
Coproporphyrin I 1, 65, 74, 151
Coproporphyrin III 65, 74, 151
– tetramethyl ester 453
Coproporphyrinogen 50, 411, 425
Coproporphyrinogen oxidase 21, 65, 305, 343
– inhibition by protoporphyrin 231
Coproporphyrinogen oxidative decarboxylase 460
Coproporphyrinogenase 21
Coproporphyrinogen I 460
Coproporphyrinogen III 453, 460
Coproporphyrinogen IV 460
Corticoids 295
–, permissive role of 295
Counter-current technique 373, 425
Cryptopyrrole 172
Cyclic adenosine monophosphate (cAMP) 203, 246, 258, 295, 302
Cycloheximide 115, 252, 258, 463, 472, 494
Cystathionase 124
Cystine 79, 124
DL-Cystine 79
L-Cystine 79
Cystine polysulphide 124
Cystine trisulphide 79
–, effect of 79

–, stereoisomers of 79
Cytochromes 9, 28, 237, 302
– absorption spectra 42
– a-, b-, c- and d-type 42
– $a+a_3$, b, c 9
– b_1 cytochrome 9
– b_5 cytochrome 237, 295, 305
Cytochrome c oxidase
Cytochrome 50
– during anaerobic growth 50
– formation 9
Cytochrome P-450 172, 187, 224, 237, 246, 295, 302, 305, 314, 354
– apoprotein 266
– effect of DDC 196
– and vitamin C deficiency 237
Cytochrome P-450 and b_5 237
– in adrenals, kidneys, spleen 237
Cytochrome P-450 synthesis 246
Cytochrome synthesis 9
– repression by glucose 9

DDC-induced porphyria 246
Decarboxylation of uroporphyrinogen 305
Dehydrocoproporphyrin 453
Dehydroepiandrosterone (DHA) 314, 367
Dehydroisocoporphyrin 433
Desulfovibrio desulfuricans 50
Deuteroporphyrin 425
Dexamethasone 295, 314
Dibutyryl cyclic adenosine monophosphate 203
3,5-Dicarbethoxy-1,4-dihydrocollidine (DDC) 187, 196, 211, 246, 252, 258, 266, 286, 295, 302, 305
Dicophane 266
Dipyrromethane 460
Dipyrrylmethanes 157, 411, 460
Disorders of porphyrin metabolism 367
Dithiothreitol 86
Drug interactions 266
Drug metabolism 224

Egosterol
– effect on porphyrin formation 1
Electrophoresis 488
Emasol
– effect on porphyrin formation 1
Embden-Meyerhof pathway 101
Endoplasmic reticulum 237
Enterohepatic circulation
– of plasmic tricarboxyporphyrin 460
Enucleation
– in hamster 146
Erythrocytes
– metabolism of ALA and PBG 343
Erythroid cells 464, 472
Erythropoietic protoporphyria 494
Erythropoietin 286
Escherichia coli 28, 42, 57, 65
Ethanol 305
–, hepatic metabolism of 252
Ethanol intoxication 252
Ether-soluble porphyrins 425
DL-Ethionine 21
Ethionine, effect on coproporphyrin 21
Etiocholanolone 302
Etiocholanolone glucuronides 286
Etiocholanolone-3-hemisuccinate 295
Euglena 453
Euglena gracilis 57
Europorphyrin 383
Evolution 415
Experimental porphyria 187, 211, 302

Feedback inhibition of porphyrin biosynthesis in *E. coli* 65
Feedback repression of ALA synthase by heme 314
Felty's syndrome 433, 441
Ferricyanide 50
Ferrochelatase (FC) 65, 74, 138, 237, 246, 354
Ferrochelatase (heme synthase, protoheme ferrolyase) 28, 65
Free heme 302
Free porphyrins 305, 441
Fructose-6-phosphate 101
Fumarate reductase 28, 176
–, NADH dependent 178

Galactose 9
Globin synthesis 463, 472, 494
Gluconeogenesis 178, 295

Glucose 1, 9, 50, 65, 101, 295, 302
– and cytochrome content 42
– effect on ALA synthase 9
– effect in liver homogenate 124
– and heme synthesis 9
– induction of G6P 9
– inhibition of urogen synthase 9
– 'repressive effect' 28
Glucose-6-phosphate 9, 101
Glutamate 181
Glutamate dehydrogenase activities 211
Glutethimide 231
^{14}C-glycine 224
Glycine 9, 28, 124, 187, 246, 266, 463, 472, 494
– acyltransferase 187, 246
– metabolism 187
– N-acylase 187
Glycogen metabolism in yeast 9
– and protoheme synthesis 9
Glycyl acyltransferase 246
Griseofulvin 246, 302
GSH/GSSH 79

Harderian gland 146
Harderoporphyrin 373, 389, 453, 460
Helianthus 108
Heme (Haem) 21, 28, 266, 295, 305, 460, 463, 472, 488, 494
–, ALA synthase enhancement of 1
–, feedback inhibition by 1, 211
– intracellular 74
–, metabolism of 480
Heme and apoprotein biosynthesis 237
Heme biosynthesis 57, 246, 266, 295, 302, 314, 326, 334, 343, 373, 411, 463, 494
–, control of 463
– and cytochrome synthesis 187
– effect of L-ascorbic acid 237
– effect of DDC 196
– effect of oxygen 50
– in experimental porphyria 181
–, inhibition of 302
–, regulation of 181, 354, 463, 472, 494
–, regulation of, and succinyl CoA 176
Heme degradation 302
Heme oxygenase 295
Heme pool 295, 463
Heme precursors
– effect of benzoic acid 187
Heme, synthesis of
– influence of Ca^{2+} and Cu^{2+} 21
Heme synthesis and sideroblastic anemias 172
Hemin 65, 211, 258, 302, 463, 472, 494
– ALA synthase 21
– dimethyl ester 343
– effect of porphyrin accumulation 211
– exogenous 74
–, inhibition of 21
– inhibition of ALA synthase 21
– repressor of the formation of ALA synthetase 21
–, supplementation in 74
Hemochromatosis 367
Hemochrome 42
Hemoglobin 472, 494
Hemopexin 246, 480, 488, 494
– and feedback inhibition by heme 246
–, induction by 246
–, metabolism of 488
Hemoprotein 314
–, mechanism of 246
Hepatic heme synthesis 295
Hepatic iron pool 305
Hepatic porphyrias 314, 401
–, human 354
–, experimental 266
– in birds 211
–, hereditary 314, 334
Hepatic porphyrin biosynthesis
–, regulation of 343
Hepatic siderosis 305
Hepatocytes 231, 302, 494
Hepatocytes in PCT 305
Heptacarboxyporphyrin 28, 231, 246, 305, 343, 373, 389, 401, 433, 448
Hereditary coproporphyria (HCB) 314, 354, 389
Heterotrophic bacteria 57
Hexacarboxyporphyrin 28, 231, 305, 343, 373, 389, 401, 433, 448
Hexachlorobenzene (HCB) 211, 246, 305, 367, 433, 460

Hexachlorobenzene and porphyria 224
Hippurate 246
Hippurate biosynthetic pathway 187
Hippurate transferase 187
Human porphyrias 367
Hydrocortisone 295
Hydroxylated porphyrins 373
Hydroxypropionate porphyrins 460
bis-Hydroxypropionate porphyrin 453
Hypocholesterolemic agent 302
Hypocholesterolemic agent AY9944 286

Idiopathic sideroblastic anemia 138
Imidazole 74
Immunoelectrophoresis 494
Inducers of ALA synthase 302
Inhibition of the synthesis of urogen synthase 9
Insulin 302
Iron 463, 472
–, feeding of 305
–, release from transferrin 463
Iron accumulation, pathogenesis of 172
Iron-binding protein 463
Iron chelatase 74
Iron-deuteroporphyrin IX 480
Iron metabolism 367, 494
Iron pools 367
Iron storage
– influence of L-ascorbate 237
Iron-transferrin 463
– complex 463
Isocoproporphyrin 373, 401, 460
–, mass spectrum of 433
– faeces 433
–, metabolism of 433
Isonicotinic acid hydrazide 463, 472

α-Ketoglutarate 138, 252, 302
Klebsiella pneumoniae 57
Krebs cycle (tricarboxylic acid cycle) 28

Lactate 28, 65, 305
– dehydrogenase 28
– DL-lactate 28, 74
– effect on porphyrin synthesis 28
– enhancement of porphyrin biosynthesis 28
Laevulic acid 115
Lead exposure 326
Lindane 266, 302
Lipid soluble drugs 302
Liver ALA synthase 305
Liver cells of chick embryo 231, 258, 266, 276, 314
Liver damage 211
Liver heme 196, 211, 266
–, degradation of 196
Lubrol 252

Malate 181
– dehydrogenase 176
Menstrual cycle 286
2-Mercaptoethanol 86
Mesocricetus auratus 146
Mesoporphyrin 266
Metalloporphyrin 42
Methionine effect on heme synthesis 21
N-Methyl-N′-nitro-N-nitrosoguanidine 65
Micrococcus denitrificans 21, 74
Micrococcus lysodeiktikus 50
Microsomal cytochromes 237
Mitochondria 9, 494
– of reticulocytes 463, 472
Mitochondrial cytochromes in liver 237, 295
Monovinylmonoethyl deuteroporphyrin 373
Monovinyl monopropionic deuteroporphyrin 425

NADH 21
– assay of lactate dehydrogenase 28
NADH-cytochrome c reductase 463
NADH/NAD^+ ratio 252
NADH oxidase, inhibition of 203
$NADP^+$ 21
NADPH cytochrome reductase 367
Nicotina tabacum 57
Nitrate 50
Nucleotides 252

Operon and porphyrin synthesis 65
Oral contraceptives 286
Orciprenalin 295

Orthophenanthroline 50
Oxaloacetate 176
17-Oxosteroid 314
Oxygen
– effect on ALA synthase 74, 79
– effect on cytochrome 28, 42
– effect on heme synthesis 42
– effect on heme synthesis in *Escherichia coli* 50
– effect on heme synthesis in pseudomas 50

Paper electrophoresis 401
Paper chromatography of porphyrin methyl esters 425
Pasteurella multocida 57
Pemptoporphyrin 453
Pentacarboxyporphyrin 28, 231, 305, 343, 373, 401, 433, 448, 460
Pentacarboxyporphyrinogen 433
Permeability factors 302
Phenazine methosulfate 50
Phenobarbital 224, 258, 295, 302
– effect on ALA synthase 237
Phenobarbitone 266
Phenylbutazone 266, 295, 302
Phenylhydrazine 94
Phosphoenolpyruvate 101
Phosphodiesterase 203, 246
Phosphohistidine 128
Phosphorylation 28
– of enzyme-bound CoA 128
Phytochrome 108
Plasma 488
Plasma porphyria levels 494
Plastids 108
Polychlorobiphenyl (PCB) 211, 224
Polyhalogenated aromatic compounds
– effect on microsomal enzymes 224
Polymerisation of FBG 460
Polypeptone 42
Porphobilinogen (PBG) 65, 146, 151, 160, 187, 246, 258, 314, 326, 334, 343, 354, 367, 383, 401, 415, 419, 460
– urine 314
– lactam 419
– faeces 314
Porphobilinogen deaminase 65, 151
– uroporphyrinogen III cosynthase 9
Porphobilinogen excretion, effect of bencoic acid 187
Porphobilinogen oxygenase, induction by steroids 160
–, properties of 160
Porphobilinogenase 108
Porphyria 411, 460
– in birds 224
–, chemically-induced 187, 211
–, experimental 181, 211, 246, 266
Porphyria cutanea tarda (PCT) 172, 305, 314, 354, 389, 401
– symptomatica 433
Porphyric rats 302
Porphyrin 28, 441
– accumulation in kidneys 224
– accumulation in liver 224
– bile 211, 373, 433
– blood 373
– duodenal fluid 433
– effect of hemin 1
–, ethersoluble 373
–, excretion of 246, 343
– in experimental porphyria 231
– faeces 373, 389, 460
– fecal 246
–, formation of 334, 415
– in liver 231
– meconium 373
– porphyrin P(1) 441
– porphyrin P(2) 441
– 'S-411'-porphyrin 373, 453
– suppression by hemin 74
–, urinary 246, 343
– urine 401, 433
– X-porphyrin faeces 401
– X-porphyrin fraction 373
Porphyrin accumulation 276
Porphyrin biosynthesis 21, 65, 203, 231, 334, 343, 460
–, drug induced 276
– enhancement by lactate 28
–, glucose effect on 101
–, inhibitor of 108
– kinetic factors 415

–, 17-oxosteroid control of 314
–, regulation of 286
– regulation by ATP 203
–, stimulation of 74
Porphyrin carrier protein 488
Porphyrin excretion 343
Porphyrin fluorescence 334
Porphyrin formation 286
– effect of protoporphyrin 231
– in hepatocytes 231
Porphyrin-heme formation
–, regulation of 286
Porphyrin-like compound 50
Porphyrin metabolism, side pathways of 460
Porphyrin-metal chelatase 266
Porphyrin methyl ester zinc chelates 231
Porphyrin methyl esters 343, 425, 441
Porphyrin organosynthesis, thermodynamic parameters 415
Porphyrin patterns in human erythrocytes in AIP 343
Porphyrin peptides 74, 401
Porphyrin precursors 326, 343
Porphyrin production, effect on ferric chloride 1
Porphyrin synthesis 101, 343, 494
–, glucose effect on 9
– inhibitor 101
–, regulation of, and cytochrome synthesis 187
Porphyrinogen 415
Porphyrinogen decarboxylation 411
Porphyrinogenic agents 286
– drugs 252
Porphyrins 65, 187, 276, 343
– abiotic formation 415
– according to the biosynthetic chain 343
–, analysis of 211
– biogenesis 415
–, enterohepatic circulation of 433
– faeces 314
–, formation of 1, 266
– of isomers III 305
– in kidneys 211
– in the livers of birds 211
– regulation of biosyntheses 415
– regulation of organosyntheses 415
– urinary 305, 343
– urine 314, 373
– X-porphyrins 302, 314, 389
Pregnancy 286
5β-pregnan-3α-ol-20-one 286
Pregnanediol 367
Preganetriol 367
Pregnanolone 286
Progestational components 286
Progesterone 231
Promitochondria 1, 9
Propionate 181
Propylene glycol (PG) 286
Propylisopropylacetamide (PIA) 276, 302
2-Propyl-2-isopropyl-acetamide 266
Proteus vulgaris 57
Protochlorophyllide 108
– holochrome 108
Protoheme 28, 42, 50
– content in bacteria 42
– synthesis 9
Protoporphyrin 9, 21, 28, 50, 65, 138, 172, 231, 246, 266, 343, 373, 389, 401, 411, 433, 453, 460, 463
– accumulation during anaerobic growth 50
– effect of glucose 50
– erythrocytes 494
– plasma 494
Protoporphyrinogen 425, 453
Pseudomonas aeruginosa 28, 42, 57
Puromycin 28
Pyrazole 252
Pyridine hemochrome 28, 42, 74, 196
Pyridine hemochromogen 50
Pyridoxal phosphate (PLP) 9, 94
–, effect on ALA synthase 138
Pyrogallol 28
Pyruvate 176, 305
– carboxylase 176
Pyrrole 415
Pyrrole ring intermediates 415
Pyrroles, oxidation of 172
Pyrrolinone 160
Pyrrolooxygenases 160, 172
Pyrrylmethanes 151, 460

Rat liver, perfused 295, 302
Rate-limiting enzyme 28
– of limiting porphyrin biosynthesis 57
Red cell production, enhancement by pyridoxine 138
Reduced glutathione 86
Respiratory adaptation 9
Respiratory chain 28, 463
Reticulocytes 494
– of rabbits 463, 472
Rhodopseudomonas spheroides 1, 21, 79, 101, 425
– grown on iron-free media 1
mRNA for ALA synthase 258

Saccharomyces anamensis 1
Saccharomyces cerevisiae 1, 9
Sarcina lutea 42
Schiff base 94
Serum glutamate dehydrogenase 211
Sickle cell disease 494
Smooth endoplasmatic reticulum (SER) 211
Sodium borohydride 50, 94
– reduction porphyrin to porphyrinogen 28
South african genetic porphyria 354
Spirographis spallanzanii 453
Staphylococcus albus 42
Staphylococcus aureus 50, 57, 65
Staphylococcus epidermidis 28, 50, 57
5β-steroids 326
Steroid detoxification system 314
Steroid metabolites (5β-conformation) 286
5β-H-steroids 286, 302, 314, 367
5β-H-steroid pregnanediol 302
Suburoporphyrins 74, 389, 411
Succinate 124, 181, 203
– cytochrome c reductase 9
– induction succinyl CoA synthetase 181
– and reduction of fumarate 181
– 2,3-^{14}C-succinate 252
Succinic thiokinase 9
Succinyl-CoA 1, 9, 187, 246, 252, 266, 314, 463
– induction ALA synthase 181
– pool 176
– reaction with succinyl-CoA synthase 128
Succinyl-CoA synthase 28, 108, 128
–, mechanism of action of 128
Succinyl hydroxamate 128
Succinylthiokinase 1
Sucrose 1
Sulfanilamide
– in experimental porphyria 187
Symptomatic porphyria 441

Testosterone 146, 286
Tetracarboxylic porphyrins 441, 460
'S411' Tetramethyl ester 433
ms-Tetraphenylporphyrin 415
Tetrapyrrole 1
–, feedback regulation of 74
Tetrypyrrole biosynthesis, regulation of 1
Tetrapyrrole synthesis 411
– in *Chlorella* 115
Theophyllin 203, 295
Thin-layer chromatography 74
– of coproporphyrin isomers 441
– of isocoproporphyrins 433
– of porphobilinogen 419
– of porphyrins 28, 231, 343, 441
– of X-porphyrins 401
– of urinary brown pigments 383
Thiopental 302
Thiopentone 266
Threonine 124
Transduction in *Escherichia coli*
Transcription 259
– in chlorophyll biosynthesis 108
Transferrin 463, 472
–, dissociation of iron from 172
Transferrin-bound iron 463
Translation in chlorophyll biosynthesis 108, 258
Tricarboxylic acid (TCA) cycle 28, 181
Tricarboxyporphyrin 28, 231, 343, 373, 389, 460
Tripropionate porphyrins 453
Tryptophan 480, 494
– oxygenase 295
– pyrrolooxygenase 367
Turaco porphyrin 389

'Type III' porphyrins 460
Tyrosineaminotransferase 295

Urea 1
Uridine diphosphate-glucuronic acid 286
Urinary dipyrrylmethenes 383
Urinary glucuronides 314
Urinary porphyrins, composition of 305, 343
Urobilin 383
Urogen synthase 9
Urophyrinogen synthase 9
Urophyrin 231, 305, 314, 334, 343, 383, 389, 401, 448, 494
–, decarboxylation of 448
Uroporphyrin co-synthase, effect of iron on 172
Uroporphyrin decarboxylase, effect of iron on 172
Uroporphyrin synthase 367
Uroporphyrin I synthase 295
Uroporphyrinogen 419
– uroporphyrinogen I 151
– uroporphyrinogen III 151, 460
Uroporphyrinogen decarboxylase 305, 343, 367, 460
Uroporphyrinogen III co-synthase 65, 74, 146, 151, 236
Uroporphyrinogen III decarboxylase 65
Uroporphyrinogen isomerase 74
Uroporphyrinogen synthase 334, 343,454
–, assay 334
– in erythrocytes 326, 343
–, inheritance of 326
–, microassay of 134
Uroporphyrinogen I synthase, hepatic 151, 334
Urosynthase activity in erythrocyte 367

Variegate porphyria (VP) 246, 266, 302, 354, 433
Venesection 367
Vibrio succinogenes 50
Vinylic tricarboxyl porphyrin 373
–, mass spectrum of 425
– in bile 425
Vinylic tricarboxylic porphyrin 460
Vitamin C 237, 246

Yeast, anaerobic 1, 9
–, anaerobic and porphyrin formation 1
–, porphyric 1
–, porphyrin production by 1
–, respiratory adaptation in 1
-, semi-anaerobic 1
